

The PACC mapping project: Cavan criterium

Cavan criterium circuit.

Perfectly flat, with long straights and wide corners, this is a challenging course for the enterprising rider to breakaway. An industrial area, week-end traffic is typically light, although occasional semis can make things interesting. Corners 1 & 2 are both over spoon drains which increases the challenge and required skill to traverse them at high speeds. Road surface is fine for both wet and dry racing conditions.

Approx. 25 mins travel time from Adelaide GPO.
